DEADFACE is taunting us again. After their latest attack, they left an image behind. The only problem is that the important information left behind seems to be missing from the image. Try to figure out what the chat bubble is supposed to say in the image.

Submit the flag as `deadface{flag_text}`.

SUBMIT

1. After downloading the image from the challenge card, I uploaded it to an initial website to analyze the photo for underlying text.
2. Though the website provided correct words, it somehow provided the incorrect characters
3. Out of curiosity, I tried uploading the image to ChatGPT to see what it would output, and it output the same, receiving a similar problem.
4. However, I tried swapping ‘O’ to ‘0’ and received the proper flag.
