From the talk in GhostTown, we know that the members of DEADFACE wanted to tap into a cell tower. From the sounds of it, they were successful. They may have left a device at the scene, but we need to inform the owners of the tower that it may be compromised. Find the tower and the necessary metadata so we can inform the owners that they have a security incident on their hands.

Thankfully, DEADFACE provided us a hint as to what specific cell it is in this photo.

Submit the flag as the cell identifier, service provider, and uplink frequency of the cell in Mhz. Example:
`deadface{887654_verizon_5000}`.

1. Recognizing that it I would need the location of the cell tower in order to find the carrier as well as the cell ID and uplink frequency, I did a reverse image search to locate where the initial photo was from on Google Maps.
2. This gave me the following address:
 - a. Av. Moliere 430, Granada, Miguel Hidalgo, 11520 Ciudad de México, CDMX, Mexico
3. Located address on cellmapper.net
4. Found tower that covered the right area the address was in
5. Input the flag in incorrectly with the carrier set to "telcom" instead of "telcel" at first before putting in the correct flag of

Flag: `deadface{24222725_telcel_1770}`

Tower Info

Cell 5

Cell Identifier	24222725
System Subtype	LTE
PCI	223 (74/1)
EARFCN	67036
Maximum Signal (RSRP)	-68 dBm
Direction	SE (154°)
Max RSRQ	-7 dB
Max SNR	17 dB
First Seen	3/10/2022
Last Seen	8/20/2025
Actions	Go to Cell
Uplink Frequency	1770 MHz
Downlink Frequency	2170 MHz
Frequency Band	AWS 1-3 (B66 FDD)

Cell 6

Cell Identifier	24222726
System Subtype	LTE
PCI	224 (74/2)
EARFCN	67036
Maximum Signal (RSRP)	-78 dBm
Direction	S (162°)
Max RSRQ	-8 dB
Max SNR	16 dB
